Lake Wagyu C087 is a balance between marbling from Tajima on both sides of the pedigree and growth from Kedaka and some Fujiyoshi lines.

Sire Michifuku, in particular, brings marbling prowess with very high EBVs for Marble Score and Fineness of marbling and is trait leader for Eye muscle area. Grand-sire, Itozuru Doi TF151, through the dam is also strong in all three marbling traits. Lake Wagyu C087 will be valuable for crossing on large framed cows for the production of marbled F1 progeny. TF151 and TF Itomichi 1/2 both bring growth and milk through the dam, Lake Wagyu Y034, as her milk EBV of 7 and growth EBVs are on average or above. Lake Wagyu C087 has slightly below average Birth weight EBV so can be used on opening heifers. Lake Wagyu C087 is tested free from known recessive genetic conditions.
